## Metal faced insulating panels with PIR core (QuadCore)

### Owner of the EPD:

Kingspan Sp. z o.o.  
Address: Przemysłowa 20  
27-300 Lipsko, Poland  
Contact: info@kingspan.pl  
Website: www.kingspan.com

### EPD Program Operator:

Instytut Techniki Budowlanej (ITB)  
Address: Filtrowa 1  
00-611 Warsaw, Poland  
Website: www.itb.pl  
Contact: energia@itb.pl

ITB is the verified member of The European Platform for EPD program operators and LCA practitioner [www.eco-platform.org](http://www.eco-platform.org)

#### Basic information

This declaration is the Type III Environmental Product Declaration (EPD) based on EN 15804+A2 and verified according to ISO 14025 by an external auditor. It contains the information on the impacts of the declared construction materials on the environment. Their aspects were verified by the independent body according to ISO 14025. Basically, a comparison or evaluation of EPD data is possible only if all the compared data were created according to EN 15804+A2.

**Life cycle analysis (LCA):** A1-A3, C1-C4 and D modules in accordance with EN 15804+A2 (Cradle-to-Gate with options)

**The year of preparing the EPD:** 2023

**Product standard:** PN-EN 14509: 2013

**Service Life:** 50 years

**PCR:** ITB-PCR A

**Declared unit:** 1 m<sup>2</sup>

**Reasons for performing LCA:** B2B

**Representativeness:** Polish, European

## MANUFACTURER

Kingspan Sp. z o.o. has been on the market since 2003 with the headquarters located in Lipsko (Fig.1). Kingspan exports products to almost 50 countries across five continents. The company specializes in the production of construction materials, including sandwich panels with both MW and PIR insulation core, modular coldrooms or coldstore doors. Moreover, Kingspan offers also a wide variety of ancillaries supplementing building envelope.

*Figure 1. A view of the Kingspan production plant located in Lipsko (Poland).*

## Type III Environmental Product Declaration No. 552/2023

### PRODUCTS DESCRIPTION AND APPLICATION

Sandwich panels with metal face and insulation core made of rigid polyisocyanurate foam density 37 kg/m<sup>3</sup> are produced as external and internal walls or ceilings. Wall panels can be laid horizontally or vertically.

Panels with symmetrical joint construction type: KS TL and KS TF wall panel with through fix option are dedicated for wide variety of industrial and public application.

Panel name	Thickness	Cover width	Face thickness	Coating type
KS TL wall panel	100 – 200 mm	1000 – 1150 mm	0,4 – 0,6 mm	SP;PVDF,PUR-PA
KS TF wall panel	40 – 80 mm	1000 – 1150 mm	0,4 – 0,6 mm	SP;PVDF,PUR-PA

Panels with asymmetrical joint construction type: KS AT and KS AWP-D wall panel with secret fix solution are another option for building construction in industrial and public sector.

Panel name	Thickness	Cover width	Face thickness	Coating type
KS AT wall panel	60 – 170 mm	1000 mm	0,4 – 0,6 mm	SP;PVDF,PUR-PA
KS AWP-D wall panel	60 – 170 mm	1000 mm	0,4 – 0,6 mm	SP;PVDF,PUR-PA

For roof application with minimum inclination 4°, KS RW roof panel is dedicated. Where required the same product can be assembled as wall in both vertical or horizontal orientation.

Panel name	Thickness	Cover width	Face thickness	Coating type
KS RW roof panel	40 – 160 mm	1000 mm	0,4 – 0,6 mm	SP;PVDF,PUR-PA

Another roofing option comes with KS X-dek XD panel consisting of slightly profiled upper face and bottom steel trapezoidal deck. Water tightness is ensured by additional layer (e.g. PVC membrane) either fixed mechanically or adhered, It can be installed on buildings where minimum roof slope is ≥ 0,5 °.

Panel name	Thickness	Cover width	Face thickness	Coating type
KS X-dek XD roof panel	80 – 140 mm	1000 mm	0,7 - 1,1 mm	SP;PVDF,PUR-PA

KS X-dek XG is made of load bearing trapezoidal steel deck and top layer made of glass fiber which allows various waterproof finish options (PVC, EPDM or bitumen membrane). It can be installed on buildings where minimum roof slope is ≥ 0,5 °.

Panel name	Thickness	Cover width	Face thickness	Coating type
KS X-dek XG roof panel	80 – 140 mm	1000 mm	0,9 - 1,1 mm	SP;PVDF,PUR-PA

KS X-dek XM roof panel is another variant of X-dek family, consisting of trapezoidal steel deck and top layer made of factory applied PVC membrane thickness 1,2 mm or 1,5 mm. It can be installed on buildings with minimum roof slope ≥ 0,5 °.

Panel name	Thickness	Cover width	Face thickness	Coating type
KS X-dek XM roof panel	80 – 140 mm	1000 mm	0,9 - 1,1 mm	SP;PVDF, PUR-PA

More information can be found on the Kingspan Sp. z o.o. website : <https://www.kingspan.com/>.

## LIFE CYCLE ASSESSMENT (LCA) – general rules applied

### Allocation

The allocation rules used for this EPD are based on general ITB PCR A. Production of the double metal faced insulating panels with PIR core is a line process conducted in the factory of Kingspan Sp. z o.o., located in Lipsko (Poland). Allocation was done on product mass basis. All impacts from raw materials extraction and processing are allocated in module A1 of the LCA. Impacts from the Kingspan Sp. z o.o. production were inventoried on the annual production volume expressed in m<sup>2</sup>. Water and energy consumption, associated emissions and generated wastes are allocated to module A3. Packaging materials were taken into consideration.

### System limits

The life cycle analysis (LCA) of the declared products covers: product stage – modules A1-A3, end of life – modules C1-C4 and benefits and loads beyond the system boundary – module D (cradle-to-gate with options) in accordance with EN 15804+A2 and ITB PCRA. Energy and water consumption, emissions as well as information on generated wastes were inventoried and were included in the calculations. It can be assumed that the total sum of omitted processes does not exceed 5% of all impact categories. In accordance with EN 15804+A2, machines and facilities (capital goods) required for the production as well as transportation of employees were not included in LCA.

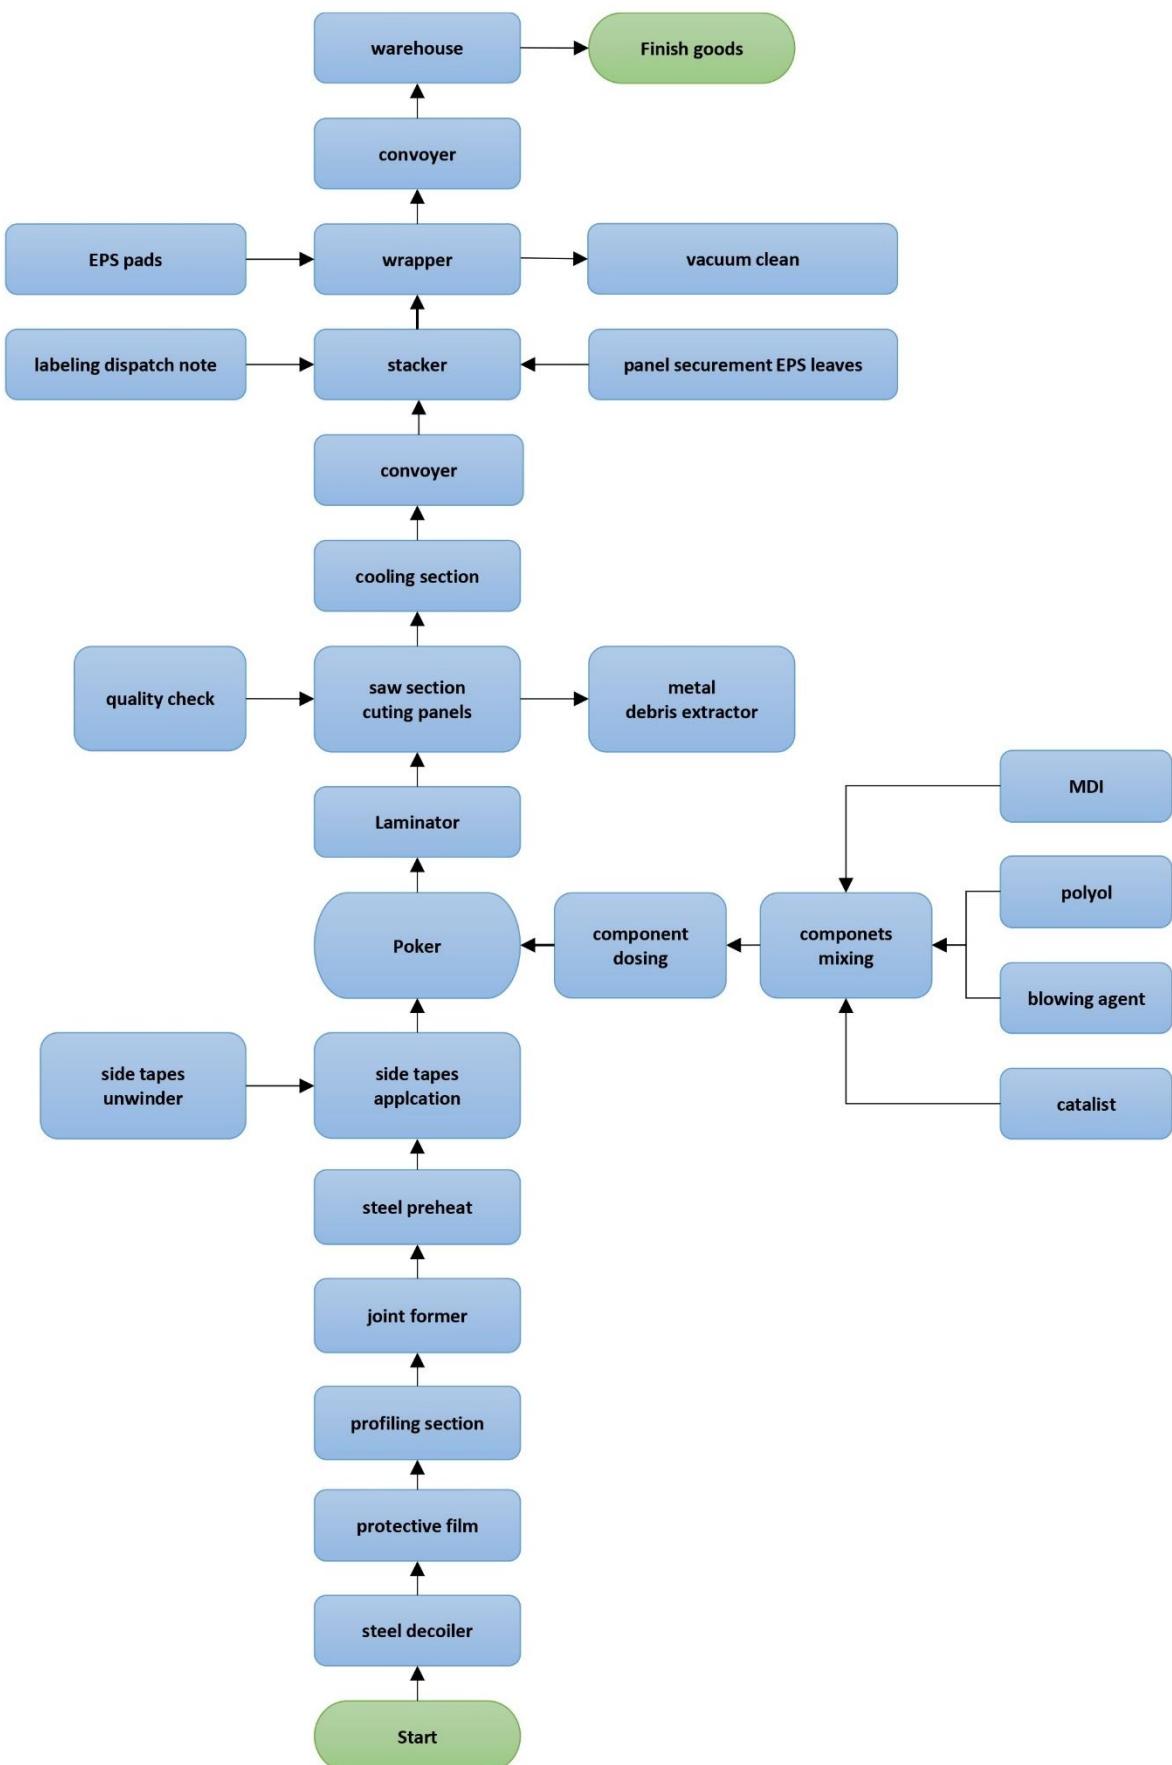

### Modules A1 and A2: *Raw materials supply and transport*

Raw materials such as steel, polyol, PVC membrane, catalysts, additives, ancillary materials and packaging materials come from both local and foreign suppliers. Means of transport include small trucks (< 10 t e.g. couriers) and big trucks (> 16 t).

### Module A3: *Production*

A scheme of the sandwich panels with PIR core production process is presented in Figure 2. The facility is ISO 9001 and ISO 14001 certified.

Type III Environmental Product Declaration No. 552/2023

*Figure 2. The scheme of metal faced insulating panels with PIR core production process by Kingspan Sp. z o.o.*

**Modules C1-C4 and D: End-of-life (EoL)**

It is assumed that at the end-of-life, 100% of metal faced insulating panels with PIR core are demounted using electric tools (module C1) and is transported to waste processing plant which is 50 km away, on 16-32 t lorry EURO 5 (module C2). It is assumed that 98% of steel plates lining are recycled and 60% of the recovered PIR cores are re-used. The residue wastes are forwarded to a landfill in the form of mixed construction and demolition wastes (40% PIR and 2% steel plates). End-of-life scenario was summarized in Table 1. Environmental burdens declared in module C4 are associated with waste-specific emissions to air and groundwater. A potential credit resulting from the recycling of the steel scrap were calculated using World Steel Association approach and are presented in module D.

*Table 1: End-of-life scenario for metal faced insulating panels with PIR core panels manufactured by Kingspan Sp. z o.o.*

Material	Re-using	Recycling	Landfilling
PIR core	60%	0%	40%
Steel plates lining	0%	98%	2%

**Data quality**

The data selected for LCA analysis originates from ITB-LCI questionnaires completed by Kingspan Sp. z o.o. using the inventory data, ITB database, Ecoinvent database v. 3.9.1 and KOBiZE. KOBiZE data is supplemented with Ecoinvent v. 3.9.1 data on the national electricity mix impact where no specific indicator data is provided. No specific data collected is older than five years and no generic datasets used are older than ten years. The representativeness, completeness, reliability, and consistency are judged as good.

**Assumptions and estimates**

The impacts of the representative of metal faced insulating panels with PIR core panels were inventoried and calculated for all products presented in Tables 3-42 for density 37 kg/m<sup>3</sup> and thicknesses of 40 mm, 60 mm, 80 mm, 100 mm, 120 mm, 140 mm, 150 mm, 160 mm, 170 mm and 200 mm.

**Calculation rules**

LCA was performed using ITB-LCA tool developed in accordance with EN 15804 + A2.

**Databases**

The data for the processes comes from Ecoinvent v. 3.9.1 and ITB-Database. Specific data quality analysis was a part of external audit. Polish electricity mix used (production) is 0.761 kg CO<sub>2</sub>/kWh (KOBiZE 2022).

**LIFE CYCLE ASSESSMENT (LCA) – Results****Declared unit**

The declaration refers to declared unit (DU) – 1 m<sup>2</sup> of metal faced insulating panels with PIR core panels manufactured by Kingspan Sp. z o.o. for density 37 kg/m<sup>3</sup> and thicknesses of 40 mm, 60 mm, 80 mm, 100 mm, 120 mm, 140 mm, 150 mm, 160 mm, 170 mm and 200 mm.

## Type III Environmental Product Declaration No. 552/2023

### Verification

The process of verification of this EPD is in accordance with ISO 14025 and ISO 21930. After verification, this EPD is valid for a 5-year-period. EPD does not have to be recalculated after 5 years, if the underlying data have not changed significantly.

The basis for LCA analysis was EN 15804+A2 and ITB PCR A

Independent verification corresponding to ISO 14025 (subclause 8.1.3.)

external

internal

External verification of EPD: Halina Prejzner, PhD Eng

LCA, LCI audit and input data verification: Mateusz Kozicki, PhD

Verification of LCA: Michał Piasecki, PhD. DSc. Eng

Note 1: The declaration owner has the sole ownership, liability and responsibility for the information provided and contained in EPD. Declarations within the same product category but from different programmes may not be comparable. Declarations of construction products may not be comparable if they do not comply with EN 15804 + A2. For further information about comparability, see EN 15804 + A2 and ISO 14025. Depending on the application, a corresponding conversion factor such as the specific weight per surface area must be taken into consideration.

Note 2: ITB is a public Research Organization and Notified Body (EC Reg. no 1488) to the European Commission and to other Member States of the European Union designated for the tasks concerning the assessment of building products' performance. ITB acts as the independent, third-party verification organization (17065/17025 certified). ITB-EPD program is recognized and registered member of The European Platform – Association of EPD program operators and ITB-EPD declarations are registered and stored in the international ECO-PORTAL.
